- ONE PIECE DESIGN
- EASILY CLEANED

"I wanted to say thanks to the folks at Imalin for bringing this simple and beneficial product to the imaging industry! My CT technologists have been using the product and they like what it does to **make the patients more comfortable and give a better CT experience** for scans that require the arms extended above the head. **The price point cannot be beat and it really works. Great product!"**

— Ray Trzeciak, Operations Manager
