"RADConnect" MESH NETWORKING AVAILABLE FOR THE FOLLOWING W B JOHNSON INSTRUMENTS:

AM-801 PORTABLE PORTAL MONITOR
AM-806 DOOR/GATE MONITOR
FALCON
EagleEYE

The AM-801, AM-806, FALCON and EagleEYE now operate on the "RADConnect" Mesh Network - an automatic communication network that allows users to monitor a full network of AM-801/AM-806/FALCON/EagleEYE as long as they are in range of a single AM-801, AM-806, FALCON or EagleEYE! Any AM-801, AM-806, FALCON or EagleEYE equipped with "RADConnect" will automatically form an intelligent self-healing mesh network allowing them to be constantly connected to each other as well as to the user network

Each AM-801, AM-806, FALCON and EagleEYE can be controlled and monitored by a PC on the network or across the internet on any Tablet or remote PC. All communication is protected through 128-bit encryption. Monitoring can be real-time or past event logs can be reviewed. Monitor the AM-801, AM-806, FALCON and EagleEYE on floor plans or map displays providing an intuitive understanding of the location of a radioactive source. Count rates can be viewed in multiple graph formats.
